## SOCIAL RESPONSIBILITY REPORT

China Datang Overseas Investment Co., Ltd.

---

SUPPLYING CLEAN POWER TO BUILD A GREEN FUTURE

# About this report

This report is the first social responsibility report issued by China Datang Overseas Investment Co., Ltd. (hereinafter referred to as "Datang Overseas Investment", "the company" or "we"), which discloses in detail the company's economic, environmental and social performance.

We solemnly undertake that the information and data disclosed in this report are true and reliable and do not contain any false statement or misleading.

## Duration

January 1, 2020 to December 31, 2020, in part beyond aforesaid scope.

## Organizational Scope

China Datang Overseas Investment Co., Ltd. and its affiliated enterprises (units).

## Reference Standards

This report is prepared in accordance with SASAC's Guidelines on the Fulfillment of Social Responsibility by Central Enterprises, with reference to the standards of the Sustainable Development Report of Global Reporting Initiative (GRI), the International Organization for Standardization (ISO26000), and the China CSR Report Preparation Guide (CASS-CSR4.0) of the CSR Research Center of the Chinese Academy of Social Sciences.

## Data Description

The financial data quoted in this report are mainly from audited financial reports, and other data are from official company documents and statistical reports, etc.

## Writing Style

The Social Responsibility Report is available in English and Chinese, in both paper and online formats.

The web version of the report is available on the company's website at

[http://www.china-cdto.com/hwtz\\_site\\_HTML/index.html](http://www.china-cdto.com/hwtz_site_HTML/index.html)

## MESSAGE FROM THE LEADERSHIP

All good principles should adapt to changing times to remain relevant. The "Belt and Road" Initiative is embracing the historical trend towards economic globalization, which meets the requirements of the times for change in the global governance system and complies with the strong desire of the peoples of all countries to live a better life. On the strength of the Initiative, the broader world witnessed again the bustling scenes of visits and trade over land and ships calling at ports. Since its establishment, China Datang Overseas Investment Co., Ltd. has always adhered to the principle of extensive consultation, joint contribution and shared benefits, followed the market principles and international rules, and actively carried out mutually beneficial cooperation with partners from various countries, and joined hands to make the blueprint of common development, sustainable prosperity and long-term peace and security of human society a reality!

**The company braves winds and waves to "go global" with high standard.** The company is determined to serve the overall diplomatic situation of the country and continuously improve the service guarantee efficiency and value contribution ability of international business to the main business of China Datang. In 2020, the total profit of the company was 129 million yuan, and the cumulative power generation capacity was 1,473.91 million kWh, and the total overseas assets reached 20.575 billion yuan, doubling the total assets at the end of 2015. We have made a new breakthrough in high-quality development. We focus on energy business, which is our main business, and all overseas institutions give full play to their front-line roles, steadily promoting the speed and efficiency of project development and construction, with the installed capacity in service exceeding 1,000 MW and the capacity under construction exceeding 1,500 MW, contributing our strength to the construction of an open, inclusive, balanced and win-win economic globalization.

**Benefiting the people; the whole world is one community.** Mankind is a community with a shared future, and the global COVID-19 pandemic has brought the destinies of nations closer together. In the face of the pandemic, the company has made every effort to ensure energy supply and normalize pandemic prevention and control work. During the inspection tour of overseas projects of 36 central enterprises, the company's Meulaboh project in Indonesia was praised by SASAC several times. We actively build bridges for mutual learning and appreciation of civilizations, continue to carry out cultural brand communication activities such as "Spring Festival Gala" and "Our Festivals", strengthen the construction of foreign voices, and lay a solid foundation for building a community of human destiny. We adhere to the central idea of "putting people first", focus on eliminating poverty, increasing employment and improving people's livelihood, and actively fulfill our overseas social responsibilities. At present, the company has 11 overseas projects, taking practical actions to promote the fruits of "Belt and Road" Initiative to benefit people in all countries.

**Sustainable and "taking root". Green mountains turn to bridges at our wish.** Green is the best pigment for the construction of "Belt and Road" Initiative in the era of "brush painting", and it is also the inevitable choice for the company to move towards high-quality development. As a central energy enterprise, we actively promote the clean and low-carbon transformation of the world's energy sources and make every effort to lay out

the new energy market. At present, the company's key pipeline projects have a capacity of more than 5,000 MW, 100% of which are clean energy. We embed the concept of sustainable development into the concrete practice of "Belt and Road" Initiative, and make every effort to protect about 100,000 square meters of forest resources during the construction of the Stung Atay Hydropower Station to achieve an effective balance between economic and environmental benefits. We actively promote the construction of "Digital Datang, Smart Power Plant", deepen international energy cooperation, and work with upstream and downstream partners in the industry chain to build a green "Belt and Road" Initiative, with the determination to leave a beautiful home in harmony with all things to future generations.

As the tide water rises, it's perfect time to set sail. In the face of the new development pattern of "building a large domestic cycle as the main body and promoting both domestic and international cycles", we will make every effort to promote the high-quality development of our international business, make a good start for the 14th Five-Year Plan of China Datang, and make new contributions to building China Datang into a world-class energy supplier and promoting the construction of a green "Belt and Road".

## Themes Mapping Out a Silk Road Blueprint, to Establish a Brand Image of High-quality Development

The millennium Silk Road spans ancient and modern times. The "Belt and Road" Initiative, based on the "Silk Road Spirit" of "peace and cooperation, openness and tolerance, mutual learning, mutual benefit and win-win", has shown the world a new concept and mode of cooperation. With the golden autumn of 2013 as the starting point, it opens a brand new chapter of the world development process. As a window enterprise of overseas business of the Corporation, the company actively participates in the construction of "Belt and Road" Initiative. By focusing on its main business and cultivating deeply, it carefully carves out "business card" projects with the spirit of "fine brush painting". The company has written an eternal footnote for "Belt and Road" Initiative by focusing on its main business and working hard. At present, the company has 11 overseas projects, with an installed capacity of over 1,000 MW in service and an annual power generation capacity of 1,473.91million kWh.

At present, the overseas projects the company invests and develops mainly includes the following:

### 6 operating projects

Total installed capacity  
**240** MW

#### ▲ Myanmar Dapein I Hydropower Station Project

With a total installed capacity of 240 MW, all 4 units were put into operation in 2010. In 2020, the power plant overcame the adverse effects of the pandemic and independently completed the repair of the flood-damaged access road, successfully coped with the biggest flood since the commissioning of the plant on August 19, and achieved stable production and increased revenue, which was highly appreciated by the Ministry of Electricity of Myanmar.

#### ▶ Cambodia Stung Atay Hydropower Project

Located in Ou Sang commune, Levon district, Pursat province, western Cambodia, with an installed capacity of  $2 \times 10 + 4 \times 25$  MW, all 6 units were put into operation in 2013, providing clean energy to Cambodia, meeting the electricity needs of 740,000 people in the central and western regions of Cambodia, and creating hundreds of jobs for the local community.

The total length of the line is about  
**294** km

#### ▲ 230kV Transmission Line Project in Cambodia

The first overseas grid BOT project of the Corporation, this transmission line project is the highest voltage level and longest transmission mileage grid project invested by Chinese power enterprises in Cambodia in BOT mode, with a total line length of about 294km. The grid accounts for one third of Cambodia's total power transmission projects. The completion of the grid has ensured Cambodia's energy independence and security, and has been hailed by the Cambodian government as "a model of friendly cooperation between Chinese enterprises and Cambodian government".

Indonesia Sumsel Power Plant Project

Located on Sumatra Island, it was put into operation on December 20, 2016, with an installed power generation capacity of 2×175 MW.

Indonesia Kendari Power Plant Project

Located on Sulawesi Island, it was put into operation on October 29, 2019, with an installed power generation capacity of 2×56 MW.

Indonesia Kalteng Power Plant Project

Located in Kalimantan, it was put into operation on November 4, 2020, with an installed capacity of 2×115 MW.

A project under construction

Meulaboh Power Project in Indonesia

With a total investment of 540 million US dollars and two 225MW sub-critical coal-fired generating units, the project is China Datang's first international tender greenfield project and the largest infrastructure project in the Aceh region in terms of investment scale. Since the construction of the project, it has provided 832 person times local job opportunities and will increase tax revenue for Indonesia by 171 million US dollars during the operation period, laying the foundation for the rapid industrialization of Indonesia.

Total project investment is  
**540** million US dollars  
171 million US dollars tax revenue  
for Indonesia

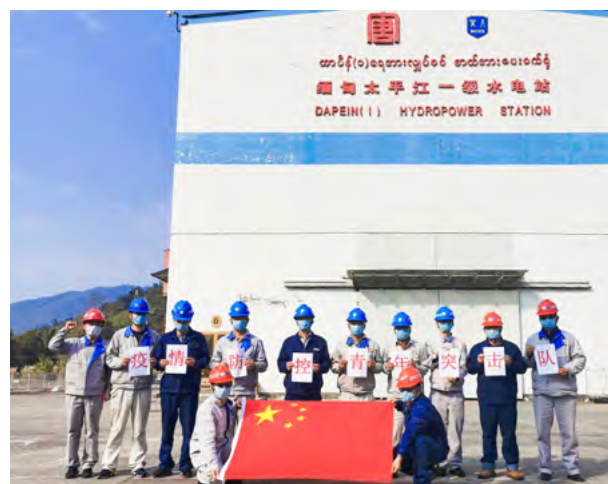

We should take into account the interests of the world. Building a prosperous and beautiful world is the common dream of all peoples. Looking ahead, the company will focus on "forging long board, mending short board, optimizing the stock and upgrading the quality", benchmarking with the first-class lean management to upgrade the market, management, the quality, taking up the responsibility, overcoming difficulties, making every effort to promote high-quality development in a deep and practical way, and making a real contribution to building an open world economy and a community of human destiny!

## Themes Standing Together Through Storm and Stress to Jointly Take Up a Fight Against the Pandemic

The century-old pandemic and the century-old changes intertwined, bringing far-reaching impacts and unprecedented challenges. With great political commitment and courage, the company has made every effort to promote overseas projects to prevent and combat the pandemic, while ensuring the resumption of overseas operating projects and the orderly progress of projects under construction, successfully fulfilling its essential responsibility of ensuring sufficient power supply and making positive contributions to building a community of human health and promoting the stable recovery of the world economy.

The "Pandemic Prevention and Control Youth Commando Team" of Myanmar Dapein I Hydropower Station

## Overseas Aid to Fight Against the Pandemic

The company has actively assisted the project countries to fight against the pandemic, compiled pandemic prevention materials in various languages, shared the advanced experience of pandemic prevention and control in China, procured nearly 90,000 sets of pandemic prevention materials from China four times, and provided material assistance to the governments and important partners of Cambodia, Myanmar, Laos, Indonesia and other countries, fully expressing the sincere feelings of neighbors helping each other to fight against the pandemic and friends joining hands to overcome the difficulties, and establishing a good image of the central enterprise.

Donation of Pandemic Prevention Materials to the Ministry of Mining and Energy of Cambodia by Dongtou and Cambodia Hydropower and Cambodia Power Grid Company

The Company Donates Pandemic Prevention Materials to Indonesian Presidential Advisory Council

## Building Compact Defenses Against the Pandemic

Faced with the severe overseas pandemic situation, the company reacted quickly and made scientific deployment, strictly complied with the local laws and regulations and pandemic prevention and control regulations in the host countries, organized each overseas organization to prepare pandemic prevention guidelines and emergency plans according to the principle of "one country, one policy", actively carried out emergency drills and took preventive and control measures. The company has purchased overseas work insurance and SOS membership services for all overseas employees, procured nearly 90,000 sets of pandemic prevention materials from China to assist overseas institutions, and organized employees overseas to vaccinate the COVID-19 vaccine, thus building compact defenses against the pandemic.

The whole system of the company has always maintained "zero suspected infection", and the affiliated Meulaboh Company, Cambodian Water Company and Bangladesh Payara Project Group have completed the special inspection of SASAC for pandemic prevention and control with high quality, and the pandemic prevention work of Meulaboh Company has been praised by SASAC several times and chosen as a model unit, and the experience of pandemic prevention has been extended to other central enterprises abroad.

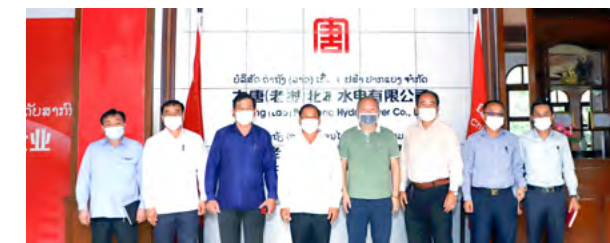

Yunnan Southeast Asia Economic and Technological Investment Industrial Co., Ltd. (shortened as Dongtou) and Cambodia Hydropower and Cambodia Power Grid Company Organized Vaccination for All Workers from China and Cambodia

## Securing Power Supply

Faced with the new situation and challenges of the global spread of the COVID-19 pandemic, the company has risen to the challenge and courageously taken up a fight against the adversity, actively promoted the resumption of work and production, made every effort to bring success to "six-stability" and "six-guarantee", achieving a win-win situation in pandemic prevention and control and production and operation. The company has achieved a historic breakthrough in overseas development, fully accomplished the annual tasks and targets, effectively maintained the stability of the supply chain of the industrial chain, lit up the lights of thousands of families along the routes, and contributed Datang solutions to the stable recovery and growth of the global economy.

# MAKING NEW ACHIEVEMENTS

## Hinging on Economic Development

Along with the continuous changes in the global economic landscape, the "Belt and Road" Initiative continues and extends the connotation of the Silk Road, which profoundly fits the dream of common development and prosperity of people all over the world. In the past 13 years, the company has responded to the responsibility of the times with high-quality development and contributed its wisdom and strength to building a new pattern of open economy and promoting the construction of a community of human destiny.

Securing Energy Supply / 20

Project Development and Construction / 22

Steady Improvement in Quality and Efficiency / 24

## SECURING ENERGY SUPPLY

As the first state-owned enterprise to "go global", the company has been deeply implementing the new development concept and promoting the high-quality development of international business. At present, the company has 6 operating projects, 1 project under construction, 4 operation and maintenance projects (including 1 assistance project), and more than 10 key preliminary projects. In 2020, the company completed a total of 1,473.91 million kWh of power generation, exceeding the annual assessment target issued by the Corporation. At present, the company's key reserve projects have a capacity of more than 5,000 MW, 100% of which are clean energy, making a new breakthrough in high-quality development.

Figure 2020

Installed capacity of in-service projects is

**1,052** MW

Installed capacity of projects under construction is

**450** MW

Installed capacity of O&M projects is

★ Cases

**Myanmar Dapein I Hydropower Station: Exceeded the target and made a good start in the New Year**

The sudden arrival of the COVID-19 pandemic has brought new challenges and opportunities for overseas enterprises. On the basis of ensuring the safety of pandemic prevention, Myanmar Dapein I Hydropower Station has been doing its best to ensure the safety and production of electricity. The Hydropower Station has been doing its best to ensure the safe and stable operation of equipment by strengthening equipment maintenance and operation dynamic management, implementing technical transformation, unit overhaul and equipment defect elimination. As of 18:59 on February 28, 2021, the annual power generation capacity of the Hydropower Station reached 100 million kWh,, an increase of 11.66 million kWh year-on-year, reaching 100 million kWh, one day earlier than the historical best value, which is a record high, and at the same time, made a good start for the New Year.

## PROJECT DEVELOPMENT AND CONSTRUCTION

The company strictly implements the "20 words" development requirements of "key breakthrough, orderly advancement, rhythm control, long-term reserve and disposal", prepares development manuals for each country, researches and forms research reports on power investment in overseas countries, and steadily pushes forward overseas business to strengthen and expand. In 2020, the company focused on the key points and made precise efforts, and used multiple strategies to tackle the problems. Datang DSSP Power Indonesia project was officially delivered, becoming the first overseas acquisition project successfully delivered by the Corporation; we have made great efforts to solve the problem of shortfall in funding of Meulaboh project. All development projects have been orderly promoted and made positive progress, and overseas business has achieved milestone leapfrog development.

# STEADY IMPROVEMENT IN QUALITY AND EFFICIENCY

Since its establishment, the company has given full play to its professional advantages in power investment and operation, and realized the leap-forward development of its overseas business from scratch and from small to large. In 2020, in the face of the new situation and new challenges of the global spread of the COVID-19 pandemic, the company has thoroughly implemented the new strategy of "Four Revolutions and One Cooperation" and the decisions of the Party Group of the Corporation, adhered to the same objectives, tasks and responsibilities, and strived to complete the operation targets. From 2016 to 2020, the cumulative profit was 754 million yuan, achieving a successful conclusion of the 13th Five-Year Plan.

## Looking Back at the "13th Five-Year Plan", Gathering Strength and Starting Again

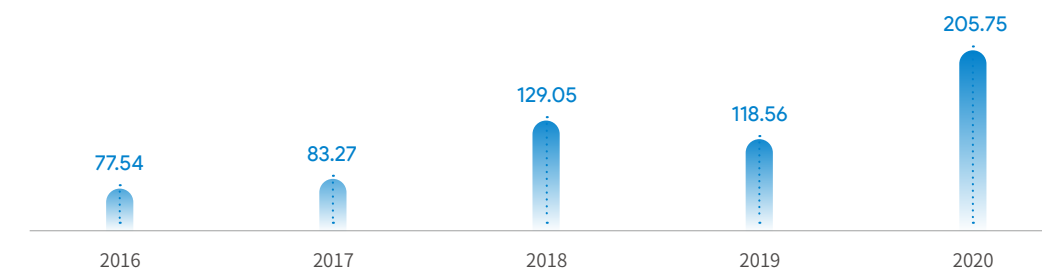

Installed capacity in service Unit: Megawatt

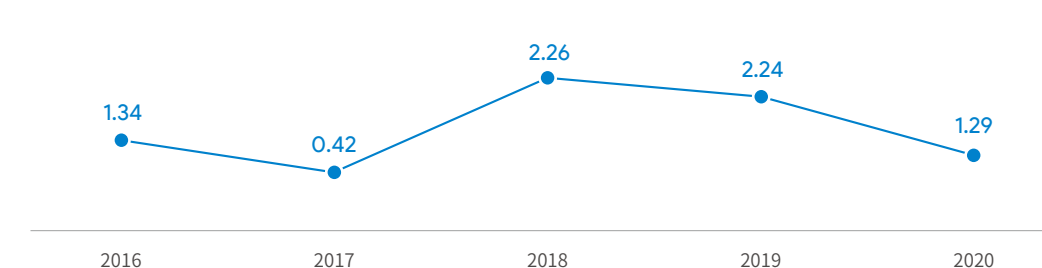

Electricity generation Unit: 10,000 kWh

Total assets Unit: 100 million yuan

Total profit Unit: 100 million yuan

The company carries out special actions to improve quality and increase efficiency, makes practical moves to reduce costs and potential, explores the market to increase efficiency, strives to achieve increased production and revenue in special periods by actively seeking to implement preferential fiscal and financial policies, optimizing debt structure, and paying close attention to "power generation and marketing".

## TAKING ON A NEW LOOK

### Centering on Safety and Environmental Protection

The company adheres to the concept of life first, actively coordinates development and safety, closely prevents various risks and challenges, investigates and rectifies hidden defects, and carries out safety education activities and emergency drills to enhance safety awareness. Based on our main business, while providing high-quality clean energy and serving the economic and social development of the resident countries, we actively seek green development and create green wealth with our partners, and work together to lay the most beautiful color for the "Belt and Road" Initiative.

Protecting the Ecological Environment / 28

Dedicating to Green Development / 29

Building a Strong Security  
Line of Defence / 30

# PROTECTING THE ECOLOGICAL ENVIRONMENT

## Improving Environmental Management

Figure 2020

- Office water consumption is **4,801.39** tons
- Electricity consumption is **601,895.73** kWh
- Disposal rate of domestic waste is **100**%

The company carefully publicizes and implements the environmental protection laws and regulations in the countries where the projects are located, regularly revises and improves the environmental protection management system and the emergency plan for environmental pollution accidents, and continuously promotes the systematization and standardization of the environmental protection management system, so as to add fuel to the Corporation's efforts to build a world-class energy supplier with "green and low-carbon, multi-energy complementarity, high efficiency and synergy, and digital intelligence".

## Practicing Green Office

In accordance with the requirements of "energy saving and emission reduction, simplicity and moderation, green and low-carbon", the company has taken multiple measures to reduce operation costs and improve energy resource utilization efficiency. The company advocates video communication instead of on-site meetings; promotes scientific classification and disposal of office waste; adopts energy-saving lamps and lanterns in the office area; guides employees to consciously establish the green office consciousness of water, electricity and paper saving, and makes every effort to create a new style of low-carbon and environmental protection.

## Carry Out Environmental Protection Public Welfare

Relying on activities such as "World Earth Day", the company widely carries out environmental protection thematic publicity and environmental protection public welfare activities such as tree planting and dredging, advocates the concept of energy conservation and environmental protection, promotes low-carbon lifestyle, and adds bricks to beautiful China and beautiful world with practical actions.

Datang (Lao) Pak Beng and Sanakham Hydropower Co., Ltd. Conducts "Morning Star" Classroom Activities at Lao Samachese High School to Promote China Datang's Green Philosophy

## DEDICATING TO GREEN DEVELOPMENT

The company insists on green and low-carbon, and is determined to build a prosperous, clean and beautiful world together with its partners. Focusing on scale and base effect, the company continuously increases the development of clean energy and new energy; strengthens the study and research of new technologies such as energy storage, hydrogen energy and smart energy, promotes the promotion and application of new business models, and takes practical actions to help accelerate the layout and construction of the world's energy clean and low-carbon development goals.

### ★ Cases

#### Stung Atay Hydropower Station: Lucid waters and lush mountains are invaluable assets

As the pioneer of the company's "going global" projects, Stung Atay Hydropower Station has spontaneously rooted environmental awareness in the whole process of project construction and operation from the very beginning, and has passed the annual environmental assessment and fire inspection in Cambodia for many years in a row. During the construction period, in order to protect the vegetation and ecological environment of the reservoir area to the maximum extent, the open channel of the secondary power station was changed to a tunnel to divert water for power generation, and the forest resources of about 100,000 square meters were guarded, which was well received by the Cambodian government and international non-governmental environmental organizations.

Stung Atay Hydropower Station

# BUILDING A STRONG SECURITY LINE OF DEFENCE

## Consolidate Safety Management

The company conscientiously implements the requirements of the Corporation's "Year of High Quality Development", and aims to strengthen the safety awareness of all staff, eliminate personal injury and death accidents, eliminate public opinion incidents, and create an intrinsically safe enterprise, and make every effort to prevent, control and investigate all safety hazards and problems. Throughout the year, the safety production was stable and good, no unsafe events such as personnel and equipment occurred, and zero non-stopping of units was achieved.

Meulaboh Company Strictly Follows the Safety Production Operation Requirements for Boiler Steel Structure Lifting

Yunnan United Carries out Venting Inspection of Diversion Tunnel

## Practicing Safety Production

The company adheres to the red line of responsibility for safety production, overcomes the impact of the pandemic and other unfavorable factors, makes every effort to complete the annual maintenance and technical reform work, organizes safety inspections in spring and autumn, flood control and three years of special management actions, investigates and rectifies hidden dangers and defects, and effectively controls safety risks. Myanmar Dapein Level 1 Hydropower Station successfully responded to the biggest flood since its commissioning on August 19, which was highly appreciated by the Ministry of Electricity of Myanmar; overseas in-service enterprises found 157 problems in the spring and autumn inspections in 2020, and completed the rectification of 146 problems, with a rectification rate of 92.9%.

Cambodia Power Grid Company Carried Out Clutch Defect Elimination

92.9%  
of issues rectified

Scan Code to Watch the Dapein I Power Station Which Defied All Odds and Overcame All Difficulties to Win the Battle of A Repair

## Reinforcement of Emergency Drills

The company insists on revising and perfecting emergency plans on a rolling basis, focuses on strengthening team construction and emergency management, and strictly controls the "six gates" of construction. By carrying out emergency drills with various themes, the company constantly strengthens the control of operational behavior, tests the practicality and operability of the emergency plan for safety production, and enhances employees' awareness of safety prevention and emergency handling ability.

### Cases

#### Myanmar Dapein I Hydropower Station: Carrying out flood control drills to improve the actual combat ability

On June 1, 2020, Myanmar Dapein I Hydropower Station of Yunan United organized a comprehensive drill of flood control emergency plan. The drill simulated a 50-year flood, set up a number of emergency links such as dam power failure, plant road collapse interruption, plant entrance water, etc., to ensure that the emergency rescue team is proficient in dealing with flood emergencies, and build a firm power station flood control and disaster prevention "dike".

## Implementing Safety Education

The company takes the opportunity of special actions such as "three-year special rectification action", "hidden danger investigation and centralized rectification", "six investigations and six strict", etc., combined with "Safety Production Month", the company organizes various and informative activities including safety commitment signature, safety knowledge competition, accident case lectures, and pandemic protection lectures to form a corporate safety culture where everyone learns safety, everyone wants safety, and everyone will be safe.

# CREATING NEW OPPORTUNITIES

## Focusing on Technology Innovation

Innovation is the first driving force to lead development. The company actively implements the national innovation-driven development strategy, plants innovative soil, continuously enhances scientific and technological innovation capability, improves innovation management mechanism, deepens cultivation of innovative talents, promotes transformation of innovative achievements, leads longer-term development with forward-looking innovative technology, and builds up momentum and energy for industry transformation and upgrading.

Driving Management Innovation / 34

Improving Technology Innovation / 35

Promoting Collaborative Innovation / 35

Indonesia Sumsel Power Plant

# DRIVING MANAGEMENT INNOVATION

## Improving Company Management

The company continuously improves the corporate governance mechanism and provides guarantee for high-quality development. The company revised the implementation rules of the "Three Importances and One Greatness" decision-making system, sorted out and improved the list of "Three Importances and One Greatness" decision-making matters in the company headquarters, increased the construction of the "Three Importances and One Greatness" system, and promoted realize the closed-loop management of the whole cycle of business. In addition, the company insisted on "one country one policy and one plant one policy", explored and promoted the production safety management concept with overseas characteristics, and ensured effective production safety management. In 2020, the company successfully completed all the assessment tasks of the Corporation.

## Adhering to Law-abiding and Compliance

The company adheres to the rule of law, integrates according to the law, strictly abides by international rules and laws and regulations of the host country in its overseas operation, and strives to be a popular Chinese enterprise. The company actively studies and learns the legal regulations, policy documents and compliance procedures of the host countries, continuously strengthens the legal compliance management in the whole process of project development, and actively organizes overseas legal training to lay a good foundation and build a solid foundation for high-quality project development.

The Company Overseas System Corporate Compliance Management Special Training

## Strengthening Risk Control

The company strictly guards the "bottom line" of risks, continuously improves the large supervision system integrating legal, risk and audit, strengthens legal review of contracts, rules and regulations and major decisions; regularly carries out internal control evaluation, actively identifies risks in project development and operation management and proposes risk prevention and control measures; formulates network equivalence assessment program to reduce information security risks and improve information system security protection capability, and escorts the high-quality development of overseas business with solid and comprehensive risk control. In 2020, the company participated in rule of law and risk control compliance training for nearly 100 person times.

# IMPROVING TECHNOLOGY INNOVATION

### Support for Patent Filing

The company has actively carried out various scientific and technological innovation related work to fully release the driving force and vitality of high-quality development. In 2020, the company organized the completion of the Dapein Runner Project and two patent declarations, and invested 2.1 million yuan in science and technology, and declared 18 patents in three years, exceeding the assessment value of the Corporation for overseas systems. Through the annual science and technology project declaration work, the process of project declaration and the method of carrying out the project were rationalized, and the foundation was laid for carrying out science and technology projects.

### Insisting on Technology Innovation

The company carries out technical research and development around the creation of overseas high-quality projects, which effectively guarantees the operating profit of the projects. We insist on promoting the construction of "Digital Datang and Smart Power Plant", continuously promoting the formulation of digital transformation plans, establishing a sound technical supervision system for overseas projects and improving all-round digital capability.

# PROMOTING COLLABORATIVE INNOVATION

The company innovates the cooperation mode with equipment manufacturing and engineering contracting enterprises holding project resources, establishes standardized negotiation framework, decision-making mechanism and control process, etc.; innovates standardized workflow and specification for M&A projects to be built, under construction and put into operation and self-developed greenfield projects, improves internal approval speed and commercial cooperation success rate, and ensures maximum value of cooperation projects.

# SUPPORTING LOCAL DEVELOPMENT

## Figure 2020

- Cambodia Hydropower and Cambodian Grid Company paid USD

**2.67** million in taxes

- Meulaboh completed investment of USD

**90.46** million

## Creating Economic Benefits

As the leader of overseas development of the Corporation, the company is based on its own business and makes every effort to serve the economic and social development of the countries and regions where it is located. 2020, Cambodia Hydropower and Cambodia Power Grid Company paid 2.67 million US dollars in local taxes in Cambodia, and Meulaboh completed investment of 90.46 million US dollars.

### Cases

#### Sanakham Hydropower Project: Cultivating people's friendship and helping local economy

On July 17, 2020, the Secretary General of the Mekong River Commission under the Ministry of Environment of the Lao PDR, Mr. Zhantale Bonaparte, and his delegation visited the Sanakham Hydropower Project site. They said that Pak Beng Sanakham has avoided and reduced environmental and social risks to the maximum extent during the project development process, and has boosted local employment and effectively driven local socio-economic development.

## Improving Local Livelihoods

The company actively accepts the leadership of overseas embassies and consulates, actively integrates into the development of project sites, carries out various forms of public welfare activities such as donations and construction assistance, helps local infrastructure construction, and takes the responsibility of Datang in the practical action of improving people's welfare.

In Laos, we repaired water-damaged roads for local communities to bring people closer together.

In Cambodia, we donated money to schools and helped improve the medical conditions of the communities where the projects are located, which was highly praised by the Cambodian side.

In Indonesia, PT DATANG DSSP Power Indonesia donated to build a mosque, helped build schools and police stations, and provided free medical services for preschool children and the elderly in four villages, allowing the project to deeply integrate with the local community; Meulaboh Company actively participated in the local flood rescue and distribution of pandemic prevention materials, winning the trust of the provincial and municipal governments and local people at all levels.

### Yunnan United: Carried out road and bridge repair, for flood control and pandemic prevention to ensure smooth flow

In May 2020, in the face of the continuous trend of the growth of outbreaks outside China, the pressure on China's foreign defence input continued to increase, and it was very difficult for personnel and materials to enter and leave the Myanmar Dapein I Hydropower Station. Myanmar Myanmar Dapein I Hydropower Station fully participated in the repair work of the river slope in Kalonka and completed the work of filling more than 200 barrels of abandoned oil barrels with sand to prepare for the repair work of the water-damaged slope in Kalonka, ensuring that both pandemic prevention and flood control were achieved.

## Providing Employment Opportunities

The company takes project construction as a grip to create a large number of local employment opportunities, and at the same time strengthens the cultivation of local talents to lay a solid foundation of talents for local social and economic development. At present, the company provides more than 2,000 jobs in overseas projects and agencies such as Myanmar Dapein I Hydropower Station, Meulaboh Project in Indonesia, Indonesia Representative Office, Myanmar Representative Office and other overseas institutions.

## Figure 2020

Providing more than **2,000** jobs

Dapein I Hydropower Co., Ltd. conducts recruitment of Myanmar staff in Myitkyina, Myanmar

## DEEPENING PRACTICAL COOPERATION

### Working with Local Partners

The company insists on treating each other with sincerity and sincere cooperation, and constantly insists on promoting the construction of "high-end circle of friends", strengthening docking and exchange with energy, power and investment departments of project host countries and local governments, building a strategic cooperation system, joining hands with each other for common development, and continuously improving the internationalization level of the Corporation.

"Thanks to the Meulaboh project for pulling Aceh's economy and employment during the pandemic, the government and people of Aceh will not forget this friendship of Datang."

Indonesia Aceh Governor Nova

#### ★ Cases

#### Indonesia Representative Office: Making friends with all parties and promote high quality project landing

In 2020, in the face of the COVID-19 pandemic, Indonesia Representative Office of the company overcame various difficulties such as pandemic prevention and control, entry restrictions and social unrest to deeply cultivate Indonesia's power market and deepen high-end friendships and cooperation relationships. The Representative Office has made exchanges with general contractors, equipment suppliers, design institutes, financial institutions, insurance agencies, law firms, etc., both at home and abroad, and established high-end cooperation relations with the Indonesian Presidential Advisory Committee, Ministry of Energy and Mining, Ministry of Industry, etc. By expanding the circle of friends, it has made every effort to ensure the high quality of project implementation.

Leaders of the Company Meet with President of IPLN

The Company Leaders Meet with Director of Nagan Raya Immigration Bureau

## Expanding International Cooperation

Focusing on the great goal of building a community of human destiny and a new type of international relations, the company continuously enhances international cooperation and actively matches with advanced power enterprises, equipment manufacturers and EPC contractors at home and abroad to achieve win-win development with its partners.

Indonesia Representative Office and Banda Aceh University Video Sign Framework Agreement on PV Project Development Cooperation

Malaysia Representative Office Conducts Project Negotiation

## Support from Professional Institutions

The company actively builds a cooperative path of unity to meet challenges and proactively connects with various professional institutions to jointly promote the smooth development of overseas projects. We dock and exchange with Deloitte, KPMG, Azmi Law Firm of Malaysia and other consulting institutions to ensure that the process of overseas project development, construction and operation is in compliance with local laws and regulations; we maintain communication with HSBC, Bank Negara Malaysia, CITIC Insurance, PICC and other financial institutions and insurance agencies to continuously broaden financing channels, explore various financing methods, strive for the lowest interest rates in project mergers and acquisitions, and improve the level of project investment returns.

The Company and Sinosure Held a Special Training on Overseas Power Project Investment and Export Credit Insurance Business Together

## ENHANCING COMMUNICATION

### Promoting Industry Communication

The company actively establishes and maintains good partnerships, builds international dialogue mechanisms and exchange platforms, and helps promote the transformation and upgrading of the industry. We actively carry out energy technology exchanges, strengthen exchanges with local professional associations and large Chinese enterprises, participate in industry exchange activities such as the Lancang-Mekong Cooperation Exhibition and the Pak Beng Regional Stakeholders Forum, and learn from the localized development experiences of all parties; communicate with major equipment manufacturers, carry out new equipment and technology learning, absorb advanced practices and development experiences of different country power industries, and promote the overall value of projects the overall value of the project will be continuously improved.

Indonesia Representative Office Participated in the "Belt and Road" Initiative and "Global Maritime Pivot Point" Synergy Development Exchange Conference

### Spreading Responsible Branding

The company continues to enrich international communication content, expand international communication channels, improve international communication ability and cultivate international communication power, actively reach cooperation with influential overseas media, promote the globalized expression, regionalized expression and audience expression of Chinese stories and Chinese voices, so that more stakeholders can hear Datang and understand Datang.

Bangladesh Media Delegation Visited Datang Power Plant

CCTV News Coverage of the STP National Power Project

Full-page Article in Vientiane Times on Datang Pak Beng and Sanakham Company's Pandemic Prevention and Control Efforts

#### Pak Beng and Sanakham Company

We have successively communicated with the People's Daily, the central organ newspaper of the Lao People's Revolutionary Party, and Vientiane Times, an English newspaper with international influence. Throughout the year, the two media published many news and publicity articles on the company's fight against the pandemic, localized construction, project promotion and volunteer services, and comprehensively promoted China Datang's global responsibility and moral commitment.

#### Dongtou and Cambodian Hydropower and Cambodia Power Grid Company

"China Datang" brand promotion was carried out by local media such as Cambodia Chinese Daily, Cambodia Chinese Chamber of Commerce, Economic Daily, Cambodia National TV, etc. The content covers donation of pandemic prevention materials to EDC, NCC, donation to Red Cross, road construction, etc. during the pandemic, so that the image of "responsible, strong and trustworthy" China Datang has become more popular.

#### China-Malaysia New Energy High Quality International Cooperation Seminar was successfully held in Datang HIT

On October 30, 2019, the China-Malaysia New Energy High Quality International Cooperation Seminar was held at Datang HIT. The participants exchanged in-depth views on Malaysia's new energy policy and market, and discussed matters of cooperation and risk control between Chinese enterprises and Malaysia's new energy major projects with investment and financing innovation, so as to create favorable conditions for strengthening relevant cooperation in Malaysia and other countries in the field of new energy and achieving mutual benefit and win-win cooperation.

# CHARTING A NEW COURSE

## Constructing Better Homes

The company insists on people-oriented, promotes the culture of knowing, loving, respecting and using talents, continuously develops and strengthens the international talent team, and gathers the most valuable wealth for overseas business. We uphold the humanistic sentiment of helping the world, adhere to the orientation of people's livelihood, and are determined to contribute wisdom and solutions for the people of the region, social stability and order, and the long-term stability of the country.

Building Employee Homes / 46

In June 2019, Cambodia Power Grid Company in Pursat substation held "prevent risks, eliminate hidden dangers, curb accidents" enterprise open day activities

## BUILDING EMPLOYEE HOMES

### Protection of Employee Rights and Interests

People-oriented is the cornerstone of the enterprise's longevity. The company insists on safeguarding the legitimate rights and interests of employees. We protect the physical and mental health of employees by improving the system of leave and health check-ups, improve the complaint and accusation system, open up the channels for complaints and accusations, and protect the legitimate rights and interests of employees; revise and issue the management methods for the remuneration and benefits of staff in overseas institutions, and improve the allowances for staff stationed abroad, so as to stimulate the enthusiasm of employees to work and start business.

The Company Held the 2021 Staff Congress

## Focus on Staff Development

The company actively opens up the channel of "talent introduction" from overseas, insists on the combination of independent training and external introduction, and makes every effort to build a "multi-talented" international talent team by means of external training, practical exercises and internal "mentoring". The company implements the "three major" parallel training paths of enterprise management, professional technology and production skills, expands the space for career development, and encourages employees to realize their own value based on their positions.

Datang Meulaboh Presents Awards to Advanced Workers from China and Indonesia

Lao Employee of Datang (Lao) Pak Beng and Sanakham Hydropower Co., Ltd. Won the 2020 Advanced Individual of the Company

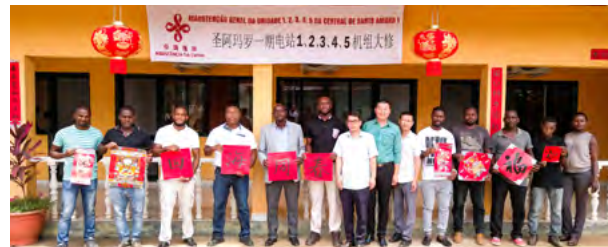

## Caring for Employees' Lives

The company actively carries out the construction of "Happy Datang", holds a series of warmth activities, provides "one-to-one" psychological counseling, and guides employees to work happily and live healthily. In addition, the company continues to promote Chinese and foreign employees to study, manage and live together, respect the religious and cultural beliefs of local employees, and continuously carry out cultural brand dissemination activities such as "Spring Festival Gala" and "Our Festival" to promote cross-cultural management integration, enhance mutual friendship, and increase employees' sense of belonging and identity to Datang's corporate culture.

Pak Beng and Sanakham Company Sends Supplies to Lao Employees Isolated at Home

Celebrating the Spring Festival

Meulaboh Company Held a Watermelon Eating Contest on New Year's Day

### Cases

#### Meulaboh Company: Celebrating Eid al-Fitr, creating a special "taste of the year"

May 24 was the most important holiday in Indonesia - Eid al-Fitr. Due to the pandemic blockage, Indonesian workers who should have celebrated the festival with their families and Chinese workers were holding on to the project site together. Meulaboh Company made elaborate preparations to let 15 Indonesian workers spend a memorable Eid in the project site and let them feel the warmth of home.

## PROMOTING RESPONSIBILITY PROCUREMENT

The company adheres to the principle of "six unifications", actively integrates and utilizes high-quality supplier resources, and makes every effort to promote the coordinated development of upstream and downstream industries and build a responsible supply chain. The company insists on the principle of openness and transparency to ensure the selection of high-quality and inexpensive suppliers. In 2020, the company carried out 49 procurement projects for consideration, and completed 13 purchases of bulk materials and equipment, without any procurement-related complaints.

## CARRYING OUT PUBLIC WELFARE SERVICES

The initiative to jointly build the "Belt and Road" aims to promote development, advocates win-win cooperation and conveys hope. In the process of "going global", the company pays full attention to creating shared value in the act of love and kindness, actively engages in social welfare, carries out various forms of donation activities, builds "mobile libraries" on boats for children on remote islands, solves practical problems for local elderly homes, and establishes long-term support mechanism for local poor families, striving to achieve a balance between economic and social benefits.

Cambodia Hydropower Development Co., Ltd. donated to the Red Cross for ten consecutive years and received sincere thanks from the Red Cross

### Cases

#### Pak Beng Hydropower Station: Warmth rushes in to make winter less cold in the mountains

A winter coat is a love. The reservoir area of Pak Beng Hydropower Station involves 3 provinces, 5 counties and 34 villages, most of which are located in high mountain valleys, with scarce resources and inconvenient transportation, making some local poor villagers' families extremely lack of winter clothes. In response, the company called on all employees to carry out "donating winter clothes for love" public welfare activities, received a total of 177 pieces (sets) of winter clothing, clothing after unified sterilization treatment to the hands of villagers in need in the reservoir area, bringing warmth and care for the local people.

# FUTURE OUTLOOK

The year 2021 marks the key year for Datang Corporation to accelerate its efforts to build a world-class energy supplier with "green and low-carbon, multi-energy complementarity, high efficiency and synergy, and digital intelligence". It is also a key year for Datang Corporation to speed up its efforts to build a world-class energy supplier with "green and low-carbon, multi-energy complementary, high efficiency and synergy, digital intelligence". As the investment platform for overseas business of Datang Corporation, the company carries the mission and responsibility for the development of the international business segment of the Corporation. With the theme of promoting high-quality development, the company will adhere to the principles of risk control, benefit priority, clean and low-carbon, and win-win cooperation, take "optimizing the stock" and "cultivating the increment" as the grasp hand, and start a new journey of the second venture, and strive to promote the

development of the world's first-class energy supplier. We will start a new journey of starting a new business and strive to achieve a new breakthrough in international business.

In the future, the company will insist on unremitting and unrelenting efforts, and take care of pandemic prevention and control as before; continue to deepen reform and inject new vitality for high-quality development; adhere to innovation and green development, and continuously open up new development paths for international business; firmly establish the concept of great security, and continue to grasp safety and stability; focus on improving operation quality, and promote comprehensive quality and efficiency; implement project financing, and promote the construction of Meulaboh project; strengthen risk

control and compliance management, and protect the reputation of international business; and actively fulfill social responsibility. The company will strengthen risk control and compliance management to protect the development of international business, and actively fulfill its social responsibility to enhance the brand awareness and reputation of Datang overseas.

In 2021, the company will be based on a new development stage, implement a new development concept, integrate into a new development pattern, and strive to start a new journey of high-quality development in the 14th Five-Year Plan, and strive to contribute more to the Corporation's ranking among the world's top energy suppliers!

RESPONSIBILITY MANAGEMENT

Responsible Governance

In order to effectively promote social responsibility work, the company has set up a social responsibility work leading group, with the main leader of the company as the leader and the head of the department of the headquarters as members, responsible for the leadership, decision-making and overall deployment of the company's social responsibility work. It studies and deploys the formulation of social responsibility planning and annual development plans through various forms such as party committees, project review meetings and special meetings, organizes the practice of social responsibility fulfillment, and participates in social responsibility business research, training and communication and other social responsibility work.

Responsible Communication

The Company attaches great importance to communication and exchange with internal and external stakeholders, builds communication mechanisms, broadens communication channels, actively listens to the voices of stakeholders and actively responds to them.
